Re: Reddie & Grose: 26851
PM 1159
Chinese Patent Application No. 85104074

Dear Antony:

Since Terry Kearney, who had taken over work with PM 1159, is no longer with Fish & Neave, and there is not sufficient time to familiarize someone else with this case, please proceed as you have outlined.

If you need inventor comments on the significance of features in claim 6, please let me know.

As you may have already noticed, the examiner's proposed claim, states "temperature 80C to 50C for a period of about 30 minutes to about 24 hours", and the range should be 80C to 150C.

Sincerely,

Beverly
